

INVESTMENT STRATEGY

The Large Cap Low Volatility Portfolio invests in the common stock of constituents of Standard & Poor's 500 index component companies with a market beta less than one with consideration given to 12-month price volatility and current dividend yield. Stocks are individually evaluated in the context of the portfolio as a whole and all eleven GICS sectors are generally represented.

PORTFOLIO OBJECTIVE

The Large Cap Low Volatility Portfolio seeks to achieve market returns at a lower level of risk by reducing exposure to market volatility and achieving consistent risk-adjusted investment performance over the long-term.

Returns are presented gross and net of fees and include the reinvestment of all income. Net returns are expressed as Gross Fees minus the advisory fee most applicable to a majority of accounts 50 bps. Returns are a composite of accounts invested in the Low Volatility Strategy. The investment management fee schedule for separately managed clients is between 35 to 180 bps. Actual investment advisory fees incurred by clients may vary.

Gyroscope Capital Management Group, LLC ("GCMG", "Gyroscope", "Gyroscope Capital", "Gyroscope Capital Management Group") is an investment advisory firm located in Naples, FL.

Gyroscope Capital Management Group, LLC ("GCMG") claims compliance with the Global Investment Performance Standards (GIPS®).

Prospective clients and other interested parties can obtain a copy of the Compliant Presentation for the Large Cap Low Volatility Composite by contacting Robert Carr by phone at 239-219-0550 or by email at rcarr@gyroscopicapital.com.

Large Cap Low Volatility Composite includes all portfolios that are at least 90% invested in our 30 stock portfolio that focuses on large cap equities with low-beta and low volatility and for comparison purposes is measured against the S&P 500 Total Return Index. The minimum account size for this composite is \$35 thousand. The Large Cap Low Volatility Composite was created December 28, 2011. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The S&P 500 Total Return Index is an appropriate benchmark for the Large Cap Low Volatility Portfolio Composite. The S&P 500 Total Return Index is a domestic equity index consisting of 500 stocks representing approximately 75% of the total U.S. equity market focusing on the large-cap sector of the U.S. equities market. It is the type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as dividends, are reinvested back into the index.

GCMG has been independently verified for the periods 10/1/2007 to 12/31/2019. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Large Cap Low Volatility Composite performance has also been examined by an independent verifier, ACA Performance Services, for the periods 1/1/2017 through 12/31/2019. Prior to period 1/1/2017 the performance was verified by Ashland Partners, LLC. The verification and performance examination reports are available upon request.

The portfolios' value may diminish at any time due to adverse market conditions. Past performance is not indicative of future returns. This material is for informational purposes only and is not intended to serve as a substitute for personalized investment advice or as a recommendation of or solicitation of any particular security, strategy, or investment product. GCMG nor its IAR's provide legal or tax advice, and nothing contained in these materials should be taken as legal or tax advice.

Return calculations use accrual basis accounting. Portfolio return calculations and valuations are based on trade settlement date. No leverage, derivatives, or short positions have been used in this composite. The U.S. Dollar is the currency used to express performance.

Assets under advisement includes strategy assets that invest in a similar manner to the Large Cap Low Volatility composite but for which GCMG only provides the model and does not transact within the accounts. Strategy assets under advisement are supplemental to the compliant presentation.
